PLAYTEST CLOUD

APRIL 2025

Meet the Player Insights Platform™

Better player insights that are cost-effective, fast, accurate and reliable to de-risk development and make games players love.

All in one place.

It’s never been this easy

Target the right players

Define your audience with a few clicks. The platform automatically recruits the right players and sends them the build with tasks and instructions.

Collect playtest results

Gameplay and player commentary are recorded, complete with transcripts and AI analysis. Easily search, sort and add your own annotations.

Turn insights to action

Build highlight reels of key moments to add engaging context to your team’s reporting. Share playtest results with anyone via secure URLs.

It’s all done for you

recruiting target players, securely distributing the build, recording the gameplay, compensating players and compiling test results with automated analysis.

1.5M

Players ready!

We've got your players

Over 1.5 million gamers in the UK, US, Canada and globally are ready to play your game.

Pick the ideal player for your test using specific criteria with 20+ different data points including demographics, gaming interests, skill levels and devices.

Robust enough for researchers

- SINGLE-SESSION PLAYTEST
- LONGITUDINAL PLAYTEST
- MODERATED PLAYTEST
- MULTI-SESSION PLAYTEST
- COMPETITOR TESTING
- PLAYER INTERVIEWS
- MULTIPLAYER PLAYTEST
- CONCEPT TESTING
- SURVEYS

Easy enough for everyone else

- Perfect your First Time User Experience
- Improve your player retention
- Add context to game analytics
- Validate your monetization strategy
- Get early feedback on concepts and prototypes
- Understand the competitive landscape
- Reduce development costs
- Uncover new audiences
- Shorten iteration loops

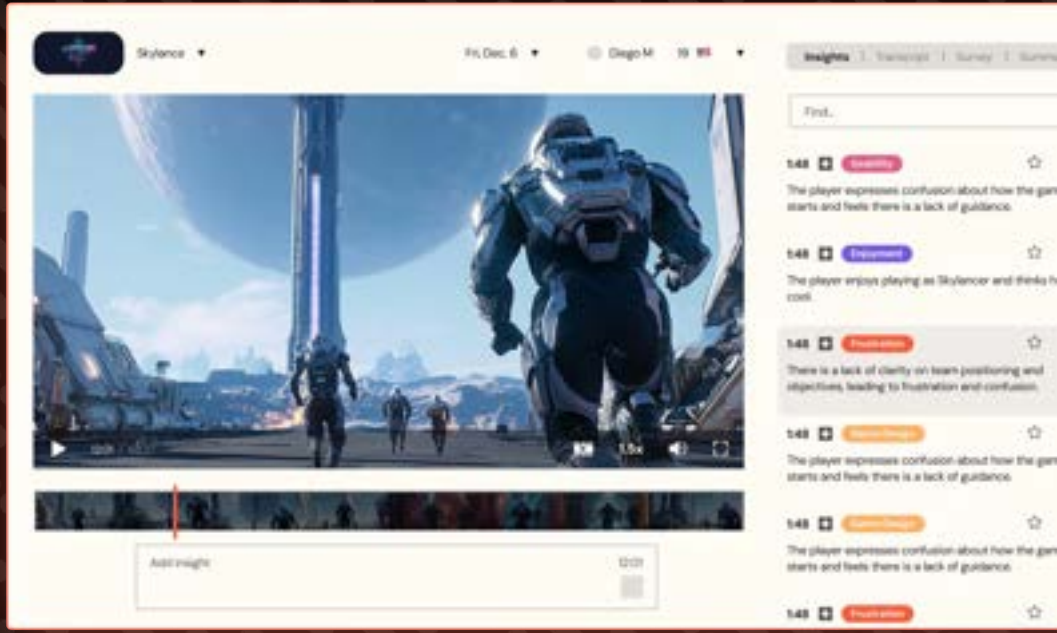
Powerful Analysis

Save hours watching playbacks.

Use AI analysis to summarize feedback and identify themes, keywords and sentiments. Then skip ahead to observe the key moments during playtests.

Annotate and collaborate easily with your team.

Add your own comments, tags and annotations, then create highlight reels to share with your team.



Available for all platforms

iOS and Android games

Share the link to the App Store or Google Play Store, or share unreleased games through TestFlight (iOS), APK or AAB files (Android).

Prototypes and concepts

Share early stage concepts and prototypes for feedback, using images, presentations, PDFs, Figma files and documents.

Browser-based content

Prototypes, browser games, and anything that can be shared via link (including game-adjacent content like premium currency stores, help centers, community pages and more!).

PC game builds

Upload a .zip file on PlaytestCloud and the platform will take care of the distribution to players.

Steam beta, demo or released games

Share the store page link, or add Steam keys for players to access your game. Works with games in Early Access, demos, unreleased games and Steam Playtest.

Surveys and interviews

Access your target audience for further research with a 100% completion guarantee.

Our researchers, or yours

Complex test planning and setup

We'll find the most efficient and effective test setup to answer your research questions. We'll even help you find the right hypothesis.

Expert analysis and reporting

Leverage the expertise of our in-house and external industry leaders to produce polished reports with advanced insights and recommendations.

Bespoke customization

Our team can support use cases outside of the standard platform and audience targeting for an exceptionally unique approach.

Training, consulting and support

Research Advisory helps teams with or without researchers advance their efforts with dedicated office hours, consulting, and access to our menu of specialized training topics.

Secure and compliant

Built for AAA studios, secure for everyone.

Securely test games in any stage of development on the Player Insights Platform™. External reviews of our platform confirm we're suitable for testing a studio's most confidential assets.

Safety (and compliance) first

Our panel includes kids aged 3-15, so in addition to GDPR we are also compliant with COPPA and GDPR Children's Code to protect everyone's data and privacy.

Always under NDA

All players who participate in research projects are under a strict NDA (custom terms possible).

Why we're different

Quality is always guaranteed

A human reviews each playtest recording for quality and technical issues. If it doesn't meet our standard, we replace it at no cost. We ensure the complete and accurate fulfillment of your order, but also your satisfaction.

An exceptional (and ethical) panel

Our players are paid upon completion in currency—no points, cash-in period or other barriers. Our payout rates are among the highest and we pair this with our screening process to maintain the highest quality panel of players available.

Experts in the house

Our Research Operations team oversees all playtests, monitors delivery, fulfills custom requests and swiftly addresses issues. The industry leaders on our team and our external bench of vetted researchers provide expert analysis, support, training and more on request.

> "Competitors might be cheaper but the quality is not consistent. PlaytestCloud is consistent with the quality of player insights from each playtest."

HOMA

“PC playtesting on PlaytestCloud is an important capability for PlayStation Studios Research.

As PlayStation works to expand the ways players can experience our first party games, we have a powerful tool doing research that ensures exceptional player experiences on PC and that helps us benchmark player expectations.”

Kristie J. Fisher, PhD
Senior Director
PlayStation Studios Research
